ON REQUEST
(with closed centre)

IMPIEGO:

Valvole formate da due deviatori a 3 vie accoppiati: ognuna delle due sezioni ha la funzione di deviare il flusso da una sola alimentazione a due uscite. Tramite un'unica leva si azionano contemporaneamente le due sezioni. Possono essere utilizzati per azionare due attuatori.

MATERIALI E CARATTERISTICHE:

Corpo: ghisa

Componenti interni: acciaio temprato termicamente e rettificato

Guarnizioni: BUNA N standard

Tenuta: trafilamento trascurabile

MONTAGGIO:

Collegare P e P' alle due alimentazioni, le bocche A e B al primo attuttore e le bocche A' e B' al secondo attuttore. Con leva in pos. 1 P alimenta A e P' alimenta A'; con leva in pos. 2 P alimenta B e P' alimenta B'. Con leva in posizione centrale le bocche di ogni sezione sono tra loro collegate (centro aperto).

A RICHIESTA:

- Centro chiuso (CODICE/CC)
- Alta pressione - fino a 400 Bar (CODICE/AP)

USE AND OPERATION:

This valve is made up by two 3-ways diverters coupled: each of the 2 parts is used to divert the inlet flow towards two ports. The single lever controls both the parts at the same time. It's ideal to control 2 actuators.

MATERIALS AND FEATURES:

Body: cast iron

Internal parts: hardened and ground steel

Seals: BUNA N standard

Tightness: minor leakage

APPLICATIONS:

Connect P and P' to the 2 pressure flows, ports A and B to the first actuator and ports A' and B' to the second actuator. With lever in position 1, P is connected to A and P' to A'; with lever in position 2, P is connected to B and P' to B'. With lever in central position all ports are connected among each other (opened centre).

ON REQUEST

- Closed centre (CODE/CC)
- High pressure - up to 400 Bar (CODE/ AP)

PERDITE DI CARICO PRESSURE DROPS CURVE

Temperatura olio: 50°C - Viscosità olio: 30 cSt
Oil temperature: 50°C - Oil viscosity: 30 cSt
