INNESTI ELETTROMAGNETICI SERIE 30900

Per ottenere i valori richiesti di coppia nominale degli INNESTI ELETTROMAGNETICI bisogna sottoporli ad una fase di rodaggio. Il completamento del rodaggio si riferisce a più operazioni di "Innesto" e "Disinnesto" della frizione ad elevata velocità con la pompa in scarico. Importante controllare nella fase di montaggio che sulle superfici di trascinamento della puleggia non vi siano presenti tracce di olio, o grasso o altre sostanze untuose, ma devono essere perfettamente pulite.

Il montaggio di elettrofrizioni, con frangia per trascinamento frontale su unità, occorre controllare l'esatto allineamento dell'accoppiamento. L'applicazione delle frizioni elettromagnetiche non deve superare la coppia nominale perché si determinerebbe uno slittamento delle superfici di contatto; questa fase non deve durare oltre 5 secondi, perché le bobine potrebbero bruciare.

EMBAYAGES ÉLECTROMAGNÉTIQUES SERIE 30900

Pour obtenir les valeurs requises de couple nominal des embrayages électromagnétiques, il faut les soumettre à une phase de rodage. Le rodage se compose de plusieurs opérations d'embrayages et de débrayage à vitesse élevée avec la pompe en décharge. Au cours de la phase de montage, il est important de contrôler qu'il n'y ait pas de traces d'huile ni de graisse ni d'autres substances grasses sur les surfaces d'entraînement de la poulie; elles doivent être parfaitement propres.

Pour le montage d'électro-embrayages avec bride pour entraînement frontal sur des unités, il faut vérifier que l'alignement de l'accouplement soit parfait. L'application des embrayages électromagnétiques ne doit pas dépasser le couple nominal car cela entraînerait un patinement des surfaces de contact; cette phase ne doit pas durer plus de 5 secondes car les bobines pourraient se brûler.

ELECTROMAGNETIC COUPLINGS SERIES 30900

Running-in is required to obtain the desired rated torque values of electromagnetic couplings. Running-in is carried out by engaging and disengaging clutch at high speed several times with the pump in exhaust position.

During assembly, make sure that there are no oil or grease traces on pulley surfaces which must be completely clean.

When assembling electric clutches with front driving flange, check for proper coupling alignment, but do not exceed rated torque because this would cause slippage of contact surface. This stage must not last more than 5 secs since coils could burn.

MAGNETKUPPLUNGEN SERIE 30900

Um mit den Magnetkupplungen auf die gewünschten Nenndrehmomente zu kommen, müssen die Magnetkupplungen einer Einlaufphase unterzogen werden. Das Einlaufen der Magnetkupplung erfolgt durch mehrmalige Ein-/Auskuppelungen bei ausgekuppelter Kupplung und unbelasteter Pumpe. Bei der Montage ist es äusserst wichtig sicherzustellen, daß in der Mitnehmerille der Riemenscheibe keine Öltropfen, Körner oder andere ölige Substanzen vorhanden sind. Die Riemenscheibe muß einwandfrei sauber sein.

Bei der Montage von Magnetkupplungen mit Flansch für stirnseitige Montage, muß sichergestellt werden, daß das Aggregat genauestens in der Achse gefluchtet ist.

Beim Einsatz der Magnetkupplungen muß ausserdem gewährleistet sein, daß das vorgeschriebene Nenndrehmoment nicht überschritten wird, da ansonsten die Kontaktflächen zu lange schleifen; diese Phase darf nicht über 5 s dauern, da ansonsten die Wicklungen durchbrennen.

SERIE: 30940/SF 12 Volt

SERIE: 30941/SF 24 Volt

Nominal torque	38,0 daNm		Connection time	25 m/sec		
Static torque	50,0 daNm		Disconnection time	40 m/sec		
Dynamic torque	33,0 daNm	at 500 rpm	Minimun time between two connection	20 sec		
	31,5 daNm	at 1000 rpm				
	28,7 daNm	at 1500 rpm				
	28,0 daNm	at 2000 rpm				
	27,2 daNm	at 2500 rpm	Max speed	5000 rpm		
	27,0 daNm	at 3000 rpm	Weight	20 Kg		
Electric absorption	Resistance (Ω)		Current (A)		Power (W)	
	20° C	120° C	20° C	120° C	20° C	120° C
12 V DC	1,81	2,60	6,60	4,62	80,00	56,00
24 V DC	7,40	10,50	3,25	2,30	78,00	54,60
All technical data are at 20°C / at 120 °C the performance are less 20%						
All electromagneteic clutches are reversible.
