GALTECH MULTIPLE HYDRAULIC GEAR PUMPS

Each design of Galtech multiple hydraulic gear pump that we offer is available in a range of specifications and in both standard and T.C (short version) alternatives. The sheer versatility of these pumps permits the assembly of a multiple pump, using only a single pump. This allows an incredibly simple means of assembling and disassembling out gear pumps.

All standard pumps can be joined together, using the multiple pump kit, to build up tandem, tripled and quadrupled pumps. For more information on the operation of our Galtech multiple hydraulic gear pumps, get in touch today!
