POWER CURVE GX160

The power rating of the engine indicated in this document is the net power tested on a production engine for the engine model and measured in accordance with SAE J1349 at a specific rpm. Mass production engines may vary from this value. Actual power output for the engine installed in the final machine will vary depending on numerous factors, including the operation speed of the engine in application, environmental conditions, maintenance, and other variables.

TECHNICAL DRAWING GX160

These technical drawings are the standard drawings, depending on the specifications of the engine the dimensions can deviate from the standard dimensions.
