MONOBLOCK DIRECTIONAL CONTROL VALVE

The Flowfit range of Monoblock Valves are simple, compact and heavy duty designed varying up to 1 to 6 sections for open and closed centre hydraulic systems.

The valves are available with parallel or series circuit.

A wide variety of service port valve options.

The applications for these Flowfit Monoblock Valves are commonly used for wood splitters, tractors, farm equipments, small fishing vessels, earth moving machines, lifting equipments, aerial platforms, boom cranes.

SPOOL OPTIONS: Double acting, Single Acting, Motor spool and Float spool

LEVER/CONTROL OPTIONS: Cable Control, Joystick, Pilot Operation, Pneumatic Operation, Electro Over Pneumatic, Direct Acting, Electro- Hydraulic, Cross rod kit

SPRING CAP OPTIONS: Spring return to centre, 1 pos Detent, 3 pos Detent

EXTRAS: Service port reliefs, High pressure carry-over, Electric dump valve

Please note valves will be supplied in original natural cast iron state and not painted yellow and black.

MONOBLOCK DIRECTIONAL CONTROL VALVES

- High technical performances granting larger application range.
- Special high resistance cast-iron body, suitable for high working pressures.
- Nickel-plated offering granting long working life under high pressure conditions (see attached scheme).
- Standard circuit in parallel grants simultaneous operations, and due to negative overlaps and dedicate metering, there is proportional movement at the working ports.
- Minimal internal leakages.
- Interchangeability of the spools also with the ones of the sectional valves with "parallel" or "single" scheme
- Possibility to reverse the control side, turning the spool of 180° permits uni cation, versatility and low value of some parts in stock.
- Free movement version "Y shape" allows high oil ow with low pressure drops, in relation with the small dimensions of the control valves.
- Above features not valid for Q35 having positive overlap. The Q35 spools are interchangeable.

NOTES FOR DIRECTIONAL CONTROL VALVES ASSEMBLY

- The three feet of the valve must always and perfectly rest on a 180° degree at surface.
- No conical nipples with JIC thread must be used.
- Before painting the control valve, do not use diluents or any products that could damage rubber parts.

MONOBLOCK DIRECTIONAL CONTROL VALVES TYPE HDM

BUCHER
hydraulics

The valves of the HDM range are compact monobloc valves, available in 4 sizes. With the combination of different directional valves, stops, operators and shock-and/or anti-cavitation valves* this monobloc is adaptable to any requirements.

The HDM valves are available with open centre, high pressure carryover or closed centre operation.

If you can't see what you need – please ask!

- Lever control
- Electro hydraulic on/off
- Parallel and series circuits
- Unload in neutral, high pressure carryover
- Ancillary Valves: shock-and anticavitation valves, shock valves, check valves

SLICE DIRECTIONAL CONTROL VALVES TYPE HDS

The HDS valve range represents a flexible unit construction, the elements of which may be combined into one valve unit as required. The valves are available connected in parallel and in series circuits. A typical valve unit comprises an inlet plate, the directional control valve sections and end plate. With all valves in neutral the flow returned to the tank (open centre). In addition high pressure carry over or closed centre circulation are available.

- Lever control
- Electro hydraulic on/off and proportional operation
- Open centre, closed centre and high pressure carryover
- Pilot operated check valves
- Priority flow control valves
- Shock, anticavitation and combined shock and anticavitation valves

HYDRAULIC HOSE-REEL VALVE LEVER OPERATED C/W FLOW CONTROL

GENERAL

This compact valve has been specifically designed to operate hose and cable reels.

The valve is fitted with an adjustable priority flow control on the inlet section, this is pressure compensated, the excess flow returns to tank.

The main relief is adjustable from 96 - 210 bar, other spring settings available upon request.

The lever operating spool slice has 4 positions.

The desired speed is selected using the speed control knob then the direction of the flow is selected using the spring centre lever, you can select forward, neutral or reverse. The lever can also be detented into a fourth position - commonly known as 'floating fourth', the fourth position allows the reel to 'free wheel' enabling the hose to be pulled off by hand. In the neutral position the reel is locked hydraulically.

Features

- Very compact
- Light weight
- Variable speed
- Pressure compensated maintaining constant speed irrespective of load or flow
- Adjustable relief valve
- Quality floating fourth kit.

SOLENOID DIVERTER VALVES

www.flowfitonline.com
TECH. DATA SHEET
DCV21

Diverters are an added extra facility to the directional control valve when it is needed for a sequence of operations, such as a safety operation or to control a selected actuator.

3 WAY

6 WAY

Note: for DFE 10-DFE 20 units the 2 way version is obtained by plugging A or B port of a DFE../3

Type	H		L		O		P	Weight	Details for Y drain connection

Internal leakage A(B)→T	<i>Ap=100 bar 1450 psi with fluid and valve at 40°C</i>	5 cm ³ /min 0.31 in ³ /min	5 cm ³ /min 0.31 in ³ /min	8 cm ³ /min 0.49 in ³ /min
Hydraulic fluid	Mineral base oil			
Fluid temperature	with NBR seals with FPM seals		from -20°C to 80°C from -20°C to 100°C	
Viscosity	operating range from 15 to 75 mm ² /s - from 15 to 75 cSt			
	minimum 12 mm ² /s - 12 cSt			
	maximum 400 mm ² /s - 400 cSt			
Max. level of contamination	-/19/16 - ISO 4406			
Ambient temperature for working conditions	with mechanical control		from -40°C to 60°C	
	with hydraulic and pneumatic controls		from -30°C to 60°C	
	with electric controls		from -20°C to 50°C	

3 WAY

It's possible to obtain 2 Way diverter valve plugging port A or B

6 WAY

WITH SPRING RETURN

17 KIT

WITH DETENT

12 KIT Detent in positions 1 and 2.
