

INFO PRODUCTS - NEW SERIE FU**PORTABLE HYDRAULIC OIL TRANSFER AND FILTRATION UNIT 15 l/min **

System manufacturers and OEMs know how important it is to start their system or machine filled with oil having the correct cleanliness class. New oil very often will not meet the required level.

Maintenance engineers know how important it is to top up the system with clean oil. They can also face situations of extraordinarily contaminated oil, sometimes even contaminated with water.

FILTREC now offer two new series of portable transfer and filtration units that deliver 15 l/min:

- **FU0020** series utilizing spin-on cartridges
- **FU0030** series utilizing a replaceable filter element

On both series the filter elements can be selected from a wide range of options to meet any filtration requirement, even for water removal.

FILTREC's quality manufacturing capabilities ensure filtration efficiency, operational safety and reliability:

- **CE marked**
- **Overpressure valve**
- **Start and stop button**
- **Premium quality hydraulic connectors**
- **Y suction filter for pump safety**
- **Visual indicator**

Please refer to the FU datasheet for all available options and features or contact our Customer Service for further information.

New models for larger flow rates coming soon!
